

# Graduate Student Climate Adaptation and Mitigation Partners (GradCAMP)

Discover a network of graduate students studying climate adaptation and/or mitigation related to working lands or waters with relevance to the Northeast - centered around climate equity and justice.

Join a virtual program where scholars learn from climate professionals working in the equity and justice fields. Monthly, virtual meetings over the course of two semesters (Fall 2023, Spring 2024) will allow GradCAMP scholars to hear from guest

speakers, meet with stakeholders, and present their research through the USDA Northeast Climate Hub's Climate Equity in Working Lands Webinar Series. The program will culminate with an in-person workshop in June 2024. Travel funding will be provided.

## SCHOLAR BENEFITS

- Expand research by exploring the climate equity and justice implications.
- Connect with other graduate students from across the Northeast in facilitated discussions.
- Network with professionals working in the climate field.
- Communicate your research to a broader audience.

## PROJECT COORDINATORS

Jen Evans, Climate Equity ORISE fellow, USDA Northeast Climate Hub  
Email: [jennifer.evans@usda.gov](mailto:jennifer.evans@usda.gov)

Jorge Vera, Extension Associate  
West Virginia State University  
Email: [jvera@wvstateu.edu](mailto:jvera@wvstateu.edu)

## PROJECT PARTNERS

Land Grant Universities and other participating universities and colleges

## APPLICATION DEADLINE

August 1, 2023

## HOW TO APPLY

Download the [application](#) from the USDA Northeast Climate Hub website. Email your completed application to Jen Evans and Jorge Vera.
