

GRADUATE STUDENT CLIMATE ADAPTATION AND MITIGATION PROGRAM (GradCAMP) 2023 APPLICATION

Join a cohort of scholars seeking to explore climate equity and justice in relation to their own climate research through activities including guest speaker presentations, webinar creation, and stakeholder engagement.

GradCAMP is seeking graduate students (Masters and PhD) studying climate adaptation and/or mitigation with a focus on working lands and waters within the Northeast. The program is open to students with at least one semester of their academic program remaining.

Please email your completed application to both Jennifer Evans at jennifer.evans@usda.gov and Jorge Vera at jvera@wvstateu.edu.

- 1.) Full Name (add preferred if different)

- 2.) Email

- 3.) What is your University/College of current degree program

- 4.) What is your expected degree?

- 5.) What is your expected month and year of your graduation?

- 6.) How did you hear about GradCAMP?

- 7.) Please provide the full name and email of your academic advisor?

- 8.) What is your area of study?

9.) What aspects of climate are you most passionate about studying? And how does this relate to working land and waters in the Northeast?

10.) If you are conducting research, please include a title and brief description of your research.

11.) Please provide a statement of your career goals, and share how GradCAMP will help to further these goals and benefit your proposed project. (100 word limit)

12.) Please describe the climate equity and justice issues that relate to your current or planned research on climate adaptation and mitigation, and/or please describe why you want to learn more about these issues.
